

# IGEL MSP

## A Comprehensive Overview of CPC's IGEL MSP Program

### Program Breakdown

CPC's IGEL MSP Program implements a credit-based system where (1) credit represents (1) device license per month. Therefore, (12) credits are needed for a device license for one year. The program offers flexible consumption models with monthly, annual, and multi-year options. Additionally, tiered pricing is available based on the number of devices, categorized as follows:

- 1-499
- 500-999
- 1000-4999
- 5000+

*The program is streamlined with a single SKU that includes Priority Plus Support.*

## Key Benefits

**Pricing**- CPC is a leading MSP in IGEL's program, allowing us to buy at the best prices. This lets us offer lower costs per device than traditional subscriptions, regardless of the consumption model.

**Flexibility**- Our solutions align with customer preferences for using IGEL services, preventing them from having to buy unwanted models or excess licenses for better pricing.

### Consumption Options:

- Monthly – pay as you consume
- Annual Commitment
- Multi-Year Commitment
- Multi-Year Commitment w/annual payment

**Simplicity**- The program offers a single SKU that encompasses all IGEL functionalities and Priority Plus Support. This approach removes the complexity of dealing with multiple SKUs and support models recently introduced by IGEL.

### License Includes

- |  |                       |
|--|-----------------------|
| • IGEL OS                              | • App Repository      |
| • UMS Mgt                              | • Insight (2025)      |
| • Media Codecs                         | • Smart Login         |
| • App Creator Portal (Enterprise Cert) | • Healthcare workflow |

## Conclusion

The IGEL MSP Program offers competitive pricing, flexibility, and simplicity. By including all functionalities and Priority Plus Support within a single SKU, it ensures that customers get the best value tailored to their specific needs, without unnecessary complexities.

**Business priorities and strategies change, so should  
your approach to desktop management.**
