

DaaS and VDI **SOLUTIONS** For Hybrid Life

Citrix has the virtualization flexibility for your organization - whether on-premises, in the cloud, or a combination of both.

how does citrix help you?

CPC's award-winning team delivers Citrix digital workspace solutions. Citrix empowers companies to securely deliver the apps and data people need to be as productive as possible—no matter where they work or which devices they use. Build your ideal workspace solution with Citrix and CPC.

Hybrid work with DaaS & VDI Solutions

As a leading DaaS and VDI provider, Citrix provides the capabilities you need to deploy virtual apps and desktops to a modern workforce. Reduce downtime, increase security, and alleviate the many challenges associated with traditional desktop management.

Business peace of mind with Secure Access

The secure access solution from Citrix provides a unified stack of cloud-delivered services that allows IT to provide a productive hybrid work environment with zero trust security.

Get insights and resolve threats with Citrix Analytics

By providing real-time insights across your Citrix environment, Citrix analytics solutions make it easy to monitor, troubleshoot and resolve issues fast. No one knows your Citrix data better than Citrix. Detect and prevent insider threats with user behavior analytics. Improve user experience. Uncover health of your environment.

Deliver access to all sanctioned IT apps Zero Trust Network Access (ZTNA)

Citrix Secure Private Access is different. Connect at the application level, improve your security posture in a remote-first world. Replace your VPN with cloud-delivered ZTNA. Create a successful BYOD program. Use adaptive authentication and adaptive access policies based on device posture, location, and risk scores. You keep data secure.
