

# Serious security for serious companies

ArcticWolf® is the security operations team you've always wanted. Cybersecurity is a field that requires 24x7 vigilance and constant adaptation. ArcticWolf® delivers uniquely effective solutions through their partnership with CPC.

## how does ARCTIC WOLF help you?

CPC specializes in the delivery of two key ArcticWolf® solutions: Managed Detection & Response, and Managed Risk. These solutions can give your business 24x7 peace of mind to discover, assess, and harden against digital risks and bad actors.

### MANAGED DETECTION & RESPONSE

Arctic Wolf® Managed Detection and Response (MDR) solution provides monitoring of your networks, endpoints, and cloud environments to help you detect, respond, and recover from modern cyber attacks.

#### DETECT

Develop greater insight into your security posture with broad visibility, 24x7 monitoring, and advanced threat detection.

#### RESPOND

Ensure threats are contained before they can do damage with managed investigation & guided response.

#### RECOVER

Learn from incidents and avoid repeating them with custom rules and workflows for security hardening against future attacks.

### MANAGED RISK

Arctic Wolf® Managed Risk enables you to discover, assess, and harden your environment against digital risks by contextualizing your attack surface coverage across your networks, endpoints, and cloud.

#### DISCOVER

Identification of assets in your environment and define the attack surface across network, perimeter, host, and accounts.

#### ASSESS

Work with Concierge Security Team to contextualize the attack surface. This enables preparation to prevent cyber attack.

#### HARDEN

You get advice on remediation actions to ensure benchmarking against best practices & continual improvement and hardening.
